# Decades of Commitment

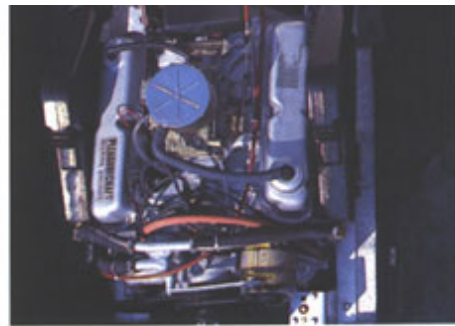

Recognized as the standard of towboat design, the Ski Nautique 2001 is the result of years of boat building expertise. Correct Craft is active in all phases of competitive skiing, and this 25th Anniversary also celebrates the company's ongoing dedication to the sport. Refinements, innovations and improved performance are reflections of Correct Craft's direct involvement in skiing.

Twenty five years ago, skiers appreciated the power and reliability of Correct Craft's classic inboard drive design. The natural progression was to build a boat specifically designed for skiers — the first Ski Nautique made its debut in 1961. In the years that have passed, the Ski Nautique has become the most widely used and easily recognized water ski towboat in the history of the sport.

Today's Ski Nautique 2001 truly represents the state of the ski boat art. The interior has been carefully crafted for comfort and quiet. The dash and gauges are ergonomically arranged for accuracy and convenience. The powerplant provides smooth, reliable performance. Twenty five years of quality and pride are built into every boat. The Ski Nautique 2001 is the celebration of a tradition of uncompromising dedication to excellence.

# Dedicated to the Family Spirit

For over fifty years, the Meloon family has been building superior pleasure boats. The Ski Nautique 2001 reflects this dedication to family and fun.

The handling and reliability that make the Ski Nautique 2001 a superior towboat also make it the ideal boat for family enjoyment. The hull has been engineered to provide precise turning and a smooth ride in all water conditions. The interior is designed for easy cruising, and is quality crafted for strength, durability, appearance and maximum comfort. The engine box houses a reliable powerplant and keeps the interior marvelously quiet. Attention to the creature comforts is evident in extra touches like storage, easy access to maintenance areas and even a built-in ice chest.

With room for six, the Ski Nautique 2001 is a delight to drive. The boat responds with eager power and planes instantly. At cruising speeds the hull rides firmly on the water. Cornering is crisp and tight. Most of all, the 18'9" hull is stable and sure in the water. Put simply, twenty five years of Ski Nautique design experience have created a boat that's a real joy for the whole family!

*The SKI NAUTIQUE is the only boat to win the U.S. Masters, Sea Week, Lake of the Ozarks and Sea*

# *A Tradition of Quality Continued*

The long standing hallmark of Correct Craft is an absolutely unflinching dedication to superior quality. The Ski Nautique 2001 is built largely by hand, and the personalized attention to detail is evident in all aspects of construction. In celebrating the 25th Anniversary of the Ski Nautique, Correct Craft also marks more than 50 years of boat building excellence.

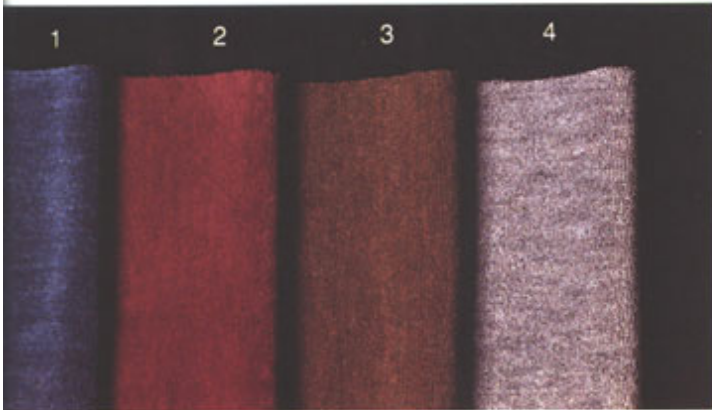

Symbolic of the company's tradition of quality is the constant quest for new and better means of construction. This year, seat frames are being made by a new "roto-cast" process. These advanced frames are stronger than wood and much more resistant to the elements. Correct Craft is a pioneer in "roto-cast" seat design, and the precise fit, durability and lasting quality of the new seats are a definite customer advantage.

Skilled craftsmen oversee every phase of Ski Nautique construction. Their standard of quality is seen in the materials, time and genuine love that go into each boat. Hull and deck are precisely mated. Stainless steel screws and rivets ensure longevity. Colors are molded directly into the hull. Pressure sensitive graphics are masterfully applied. Such complete dedication results in a superior boat that meets all Coast Guard and BIA standards.

## COMPLETING THE PACKAGE - CORRECT CRAFT TRAILERS

Securely cradling the Ski Nautique 2001 from lake to lake is a very important job. This aspect of boating is often overlooked, but Correct Craft has devoted time and attention to developing a truly superior trailer. Custom-fitted to the Ski Nautique 2001, these trailers are literally the state of the art in secure boat transportation.

Correct Craft trailers are BIA certified. The frame is constructed of 4" channel for exceptional strength. The 2" solid steel axle is durable and resistant to moisture and rust. Heavy duty springs have raised the Gross Vehicle Weight Rating to an impressive 4660 pounds. Support bunks are precisely matched to the hull for even weight distribution and a secure ride. Fenders are strong, flat and function as a convenient step plate.

Correct Craft trailers are designed for maximum operational convenience. The drive-on, drive-off feature allows complete launch and recovery without having to leave the boat. The trailer completes a very high quality boating package. As such, the Ski Nautique 2001 will deliver years of boating pleasure, exciting skiing and easy trailering.

Correct Craft, whose policy is one of continuous improvement, reserves the right to discontinue or change specifications, models, equipment or prices at any time without incurring obligations.
