

NAUTIQUE[®]

1. Slip the front of the cover over the front edge of the swim platform & pull the material below the edge of the platform all the way around.
2. Feed the webbing in between the boat and the swim platform, through the plastic buckle and connect the velcro.
3. Feed the webbing with the male buckle under the platform and connect to the female buckle.

NOTE: Be sure to attach the buckle straps for trailering. If you are just mooring the boat, tuck the straps under the material.
