

Connect Craft
ON THE WATERS OF THE WORLD SINCE 1925

2001

1982

WALTER C. MELOON
VICE PRES.

WALTER O. MELOON
PRESIDENT

RALPH C. MELOON
CHAIRMAN OF THE BOARD

WALTER H. MELOON
VICE PRES.

The legacy started by W. C. Meloon has not waned in the fifty-seven years of business. On the contrary, the second and third generations of Meloons are as active as their predecessor in bringing you the finest in pleasure boating. Product excellence is a difficult goal to achieve. Short cuts lead to compromise and compromise can be a destructive element within any manufacturing process. We, at Correct Craft, are confident that you will see the results of fine craftsmanship and boat building experience reflected in all of our models.

The enthusiasm that the new Ski Nautique "2001" has brought to the marine industry is shared by all of us at Correct Craft. An all new Ski Tique 170 and Mustang 165 now complement our ski boat line. The Fish Nautique and Sea Nautique continue to lead our fishing efforts. The 19' Southwind will again convince you that Correct Craft is on target for pleasure boating, along with its Riviera, Martinique and 20 Bowrider. You will find them all . . . On The Waters of the World."

CORRECT CRAFT TRAILERS

Quality craftsmanship and tradition does not stop with the completion of a fine boat. Correct Craft remains one of the few boat manufacturers that own and operate its own trailer manufacturing facility. These rugged trailers are designed and built for our inboard boats. This means you get a custom fit for every Correct Craft model. Proper cradling of your boat eliminates stress and evenly divides the boat's weight over the length of the trailer.

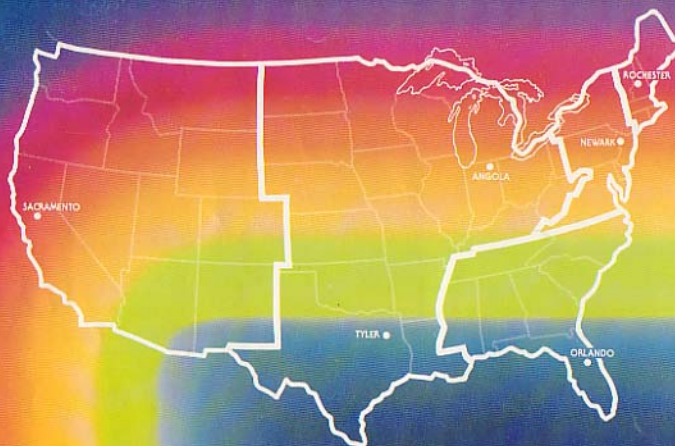

Note (in photos) how effortlessly the family can launch and recover their boat. The full loading equipment allows the boater to drive on and off their trailer. No winch to crank or positioning of boat on trailer while on the ramp. This functional feature along with our center balance design will insure many years of fun boating and easy trailering.
