"CHOICE OF CHAMPIONS"

ADVANCING THE STATE OF THE ART FOR SIX DECADES

The Correct Craft name is synonymous with high performance, superior design and uncompromising quality. For over sixty years, Correct Craft has been on the leading edge of inboard drive technology, pioneering a line of boats unmatched for responsive power and crisp handling. Each boat is virtually handmade, the product of true craftsmen proud of their tradition of excellence. A close-knit family atmosphere has flourished at Correct Craft since the company was founded in 1925. Through the years, these dedicated boat builders have focused on a singular purpose—to put the finest product available on the waters of the world.

The rich heritage of handcrafting is evident in choice materials and masterful attention to detail. Every boat earning the Correct Craft name plate exhibits the classic fit and feel of top quality. Hull and deck are precisely mated. Stainless steel screws, rivets and fasteners ensure longevity. Props and rudders are precision milled of brass for lifelong performance. Advanced composite materials and sophisticated roto-casting techniques provide significant advantages in strength, durability and weight savings. High technology glass fibers, resins and laminating schedules make hulls stronger, lighter and more nimble.

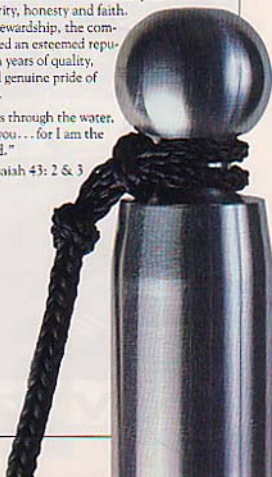

Most importantly, Correct Craft boats are built to perform in the real world. Decades of refinements, innovations and improvements are the result of Correct Craft's direct involvement in water sports. From tournament competition to family fun, Correct Craft has been a major on-water participant. Each design and advancement is thoroughly

fine-tuned through tireless lake testing and demanding performance trials. New ideas are born from experience and leadership, and proven where it really counts—out on the water.

Put simply, Correct Craft provides a boat for people who take their fun seriously, crafted by professionals who take their boat seriously. The Meloon family founded Correct Craft on the timeless principles of integrity, honesty and faith. Under their stewardship, the company has earned an esteemed reputation through years of quality, hard work and genuine pride of craftsmanship.

"When you pass through the water,
I will be with you... for I am the
Lord your God."

— Isaiah 43: 2 & 3

Models known for being well-built have a tough bodyguard.

Since 1925, *Correct Craft* has launched thousands of boats on the waters of the world. As a boat builder known for quality, Correct Craft has chosen Glidden 766 NEO GEL-KOTE® as a personal bodyguard for its five gorgeous new models.

THE TOURNAMENT TESTED LEGEND OF TOWBOAT DESIGN

The world-famous Ski Nautique 2001 has proven its leadership in tournament competition for over 25 years. The advanced hull design and classic inboard powerplant provide precise handling and responsive power. The official towboat for major tournament events around the globe, Ski Nautique 2001 is the result of years of boat building expertise and Correct Craft's deep dedication to the sport of water skiing.

Performance is a quality which is essential for serious boating whether you are a competition skier or a family out for weekend fun. Ski Nautique 2001 tracks true in the water and responds nimbly to the driver's touch.

The powerful inboard drive system is simple, reliable and easy to maintain. Engineered for a smooth ride in all water conditions, Ski Nautique 2001 is an easy family cruiser as well as a fierce competitor. The boat planes instantly and boasts crisp, tight cornering. The interior is spacious and quality-crafted for quiet comfort. Thoughtful attention to detail is evident in extra touches like abundant storage, easy access to maintenance areas and even a built-in ice chest.

Ski Nautique 2001 has the new look of a totally redesigned deck area. Usable cockpit space has been expanded for ease of entry, increased seating comfort and a roomy feel. The dashboard command center has been custom-engineered from advanced composite materials and offers easy access to vital

VDO instrumentation. A personalized name plate fits in the dash, certifying that this Ski Nautique 2001 was custom crafted for the owner. A new mirror assembly is sleek, clean and provides an expanded field of view. The no-flex windshield configuration creates high visibility, better viewing angles and improved wind protection. The row pylon has been upgraded for simpler, safer, faster rope attachment. Even the battery box has been updated, and now features better accessibility and a built-in tool box. Ski Nautique 2001 remains the proud flagship of the Correct Craft line—a visible symbol of quality and performance.

A VERY MOVING STATEMENT ON PERFORMANCE

MARTINIQUE is a classic example of why appearances can be deceiving. This beautiful 20' bowrider seats six in luxurious comfort and is elegantly crafted for a smooth, quiet ride. Beneath this handsome exterior, however, beats the powerful heart of a spirited thoroughbred. Martinique lives up to its heritage of legendary Correct Craft performance. The classic inboard drive system is reliable, easy to maintain and delivers incredible power. This family boat was born to ski.

Martinique easily pulls two barefoot skiers with four passengers aboard. The competition hull tracks a precision course, providing crisp, clean handling in all water conditions. Vital functions are monitored by sophisticated

VDO instrumentation and a powerful sound system is optional. The interior is graciously appointed, engineered for quiet and designed with a thoughtful eye for generous stowage. Easily accessible storage compartments keep skis, gear and refreshments at the ready. One look tells you that Martinique is at the head of its class in style. One ride reveals that this beauty was born to perform in the true Correct Craft tradition.

RIVIERA shares Martinique's classic breeding and impeccable performance. Riviera's enclosed bow contains a small vee-berth, storage and a head, making it an ideal big lake boat. A sun lounge is optional—the folding back seat locks up into a comfortable lounging position. Riviera's cockpit is identical to Martinique, and both boats have an optional front bench seat available. Riviera is the perfect family weekend cruiser. Its clean lines and performance hull create a classic image on the water. Riviera's style is underscored by its unmatched Correct Craft performance.

MANUFACTURER'S MARKETING REPORT

OUR MARINES HAVE A TOTALLY NEW LOOK.

Three all-new lines for all your marine upholstery and trim needs. Chrysler marine vinyls have landed in force. With three new lines that allow you to color coordinate your boats from stern to stern. These premium quality products—like all Chrysler marine vinyls—provide consistency, colorfastness, cleanability and resistance to ultraviolet rays. At a price that's truly competitive. With customer service that's second to none.

The new Northcoast line has a natural leather look featuring a bold embossed texture for a high-fashion appearance.

The new Leisure line looks like a rich denim/sailcloth combination.

The new Woven Leather line features a sophisticated, deep-grain, breathable appearance and is recommended as a companion to the Corinthian line. Special order only. Plus the proven Corinthian line with its traditional soft leather look. Design integrity, durability and

quality run deep in all these Chrysler marine vinyls. Our design team will work with you to create exactly the look you want. An outstanding selection of decor packages lets you color coordinate seating, head and hull linings, flooring, Newport carpeting, and Super Top sport topping for a total look.

So before you outfit your boats, contact the Chrysler marine vinyl team. We're tough on land and sea. Call or write Paul Decker, Sales Manager, Sandusky Vinyl Plant, 3130 W. Monroe Street, Sandusky, OH 44870. Phone: (419) 627-3286 and 87.

THE POWERFUL SOURCE- PLEASURECRAFT MARINE ENGINES

With a proud heritage of boatbuilding expertise, Correct Craft long ago established stringent standards of excellence which govern inboard powerplant selection. For more than 10 years, the engine manufacturer of choice for all models of Correct Craft boats has been Pleasurecraft Marine Engine Company (PCM). This close relationship between Correct Craft and Pleasurecraft is one which neither takes lightly. The shared foundation for both companies is based on an uncompromising commitment

to unsurpassed quality, performance and reliability. The correlation is as straightforward as the direct drive propulsion system; if the boat is a Correct Craft, then the engine is a Pleasurecraft.

Prestigiously ranked as the largest manufacturer of gasoline inboard engines in the

The 351 cid Pleasurecraft Marine Engine.

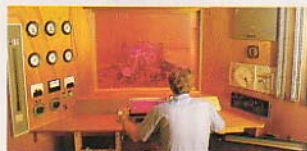

world today, PCM's prominence and success is unparalleled. Such an esteemed position is attained only with an unwavering dedication to innovation and improvement. At PCM, experienced mechanical engineers diligently strive to further enhance the performance capabilities of all PCM engines. Technological advancements in PCM engine design are the result of strict adherence to meticulous specifications and requirements.

Inboard engine technology continually affirms that the direct drive propulsion system is the easiest to maintain and the most serviceable. PCM attests that the inboard powertrain is tried and true, providing unmatched performance characteristics. PCM offers a complete selection of both Ford and GM based engines, the most extensive inboard product line in the industry.

An elaborate service parts network complements the PCM organization, which includes more than 400 full-service dealers nationwide. This broad service base for PCM engines is a critical asset.

The stated goal is to expediently deliver personalized service. With strength in numbers, PCM undeniably achieves that goal.

State of the art advancements are the enduring phenomenon at PCM. Pioneers in form and function, PCM proclaims several industry innovations. A pyramidal exhaust manifold system provides a more compact engine size and better performance. Precision adjustable, rubber-isolated mounts decrease engine vibration and assure easier adjustment for trouble-free shaft alignment and maintenance. The PCM factory warehouse system offers parts availability for dealers nationwide, while a toll free parts and service hotline satisfies immediate needs.

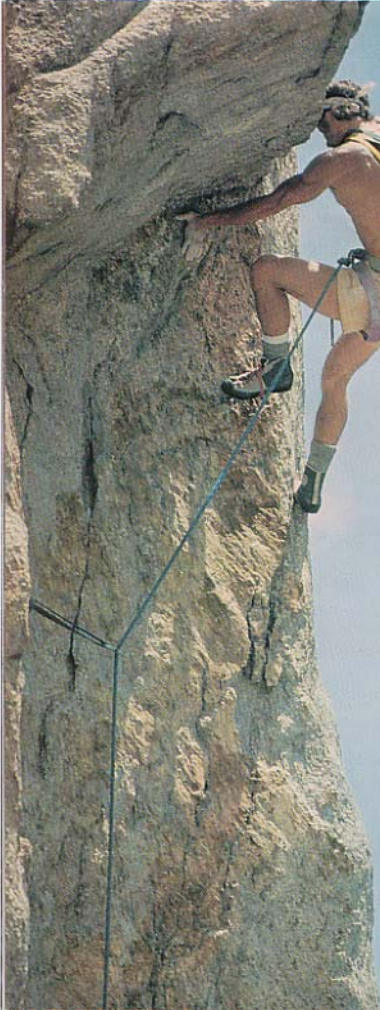

At the PCM research and development facility, engines are tested on a dynamometer to insure top performance.

As the premier inboard engine company within the competition ski boat industry, PCM is a trendsetter, establishing the ground rules, setting the standards. For the past 10 years, PCM is the only engine manufacturer to be represented at every United States National Water Ski Championship. The PCM legacy is proud and proven. Taking great strides to keep pace with the future, PCM consistently travels the extra mile, where there is seldom any traffic.

Computer Numerical Control equipment assures exacting tolerances on all PCM engine component parts.

Getting to the top requires precision.

Working at the leading edge requires precise calculation of each movement. Precision born of experience and expertise is the life-line of those committed to reaching the top.

Aristech™ Polyester Resins are produced with this kind of precision.

We know that every resin you order must perform to your exacting requirements. Our statistical control program and commitment to excellence assure you of a resin that will meet those demands.

At Aristech Polyesters, you'll find the precision team you need to work with you. We've developed a full line of resins to give you the precise properties you've told us that you need... and if we've missed one, we have the team to develop it for you.

The Aristech team has made important advances in resin technology in several areas...styrene emission resins, marble onyx and casting resins, and advanced automotive molding systems. Present us with the challenge to meet your demands!

SPECIALISTS IN PURE EXCITEMENT

BAREFOOT NAUTIQUE was created in response to the very special needs of the barefoot skier. The hull has been carefully engineered to track a precise, steady course while generating perfect wake conditions. The inboard drive powerplant is smooth, reliable and instantly responsive. Handling is crisp and true with superior cornering capability under all types of water conditions. The clean ride provides a strong, stable tow for exciting barefoot maneuvers.

Advanced VDO instrumentation offers accurate, detailed monitoring of performance functions at a single glance. Barefoot Nautique shares the same deck design as its cousin, Ski Nautique 2001. The basic Barefoot Nautique interior is streamlined for tournament action, providing function, comfort and no-nonsense performance. Barefoot Nautique's superb hull design makes it an ideal family ski boat as well, and the available luxury interior package creates the perfect boat for weekend watersport excitement. Ample storage, comfortable seating and a quiet ride complement the high performance soul of Barefoot Nautique. Born of Correct Craft's ongoing commitment to water-skiing, Barefoot Nautique represents a significant advancement in the

state of the art of family enjoyment.

DOMINIQUE is an outstanding illustration of how one good thing leads to another. In designing Barefoot Nautique, Correct Craft developed a unique hull design that not only meets the specialized needs of the barefoot skier, but also provides downright exciting performance across the board. Dominique captures this superior performance in a handsome package that makes a bold statement on the water.

Highlighted by distinctive graphics, custom interior and luxury appointments, Dominique is a most exciting addition indeed to the Correct Craft line.

A CLASSIC FISHERMAN BORN FOR BLUE WATER

In the case of Fish Nautique, form definitely follows function. Designed for serious fishermen, Fish Nautique clears the channel with a hull design born for the challenge of blue water. This center-console fisherman planes easily as the big vee-hull slices neatly through the swells. The powerful inboard drive system provides positive response, reassuring reliability and easy maintenance. Handling is true,

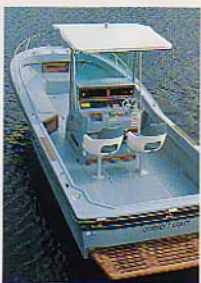

precise and confident. The ride is impressively smooth. Fish Nautique moves smartly out to sea, backed by Correct Craft quality and decades of commitment to superior craftsmanship. Fish Nautique provides a stable fishing platform with decks fully cleared for action. The cockpit is open and spacious, with room to really move. Abundant storage areas store gear easily and keep vital equipment close

at hand. A head with 5.2 gallon self-contained storage is a standard feature. Tie-down cleats are strategically positioned, and built-in rod racks eliminate clutter.

The center console is a well-engineered command center. VDO instrumentation keeps tabs on speed, fuel consumption and engine functions. Room is provided for radio, depth finder, LORAN and added instruments. An 85-gallon fuel tank provides generous capacity for comfortable cruising range.

Like all boats in the Correct Craft line, Fish Nautique is built largely by hand using only the finest materials. The dedication to superior quality provided by skilled craftsmen is welcome assurance as the shoreline slips from view. Correct Craft painstakingly inspects, tests and tunes each Fish Nautique—so out on the water all you have to worry about is finding the fish.

Fish Nautique is dedicated to the spirit of the true sportsman. A sleek, powerful craft, Fish Nautique delivers high performance and meets the special demands of serious fishermen.

CRAFTSMANSHIP AND PRIDE IN EVERY DETAIL

For more than sixty years, Correct Craft has set the standard for boat building excellence. High quality is a family tradition that dates back to 1925. Skilled craftsmen construct every boat with exceptional care, genuine pride and a sharp eye for detail. Each boat bearing the Correct Craft name meets or exceeds all Coast Guard regulations and B.I.A. standards. The manufacturing process is completed

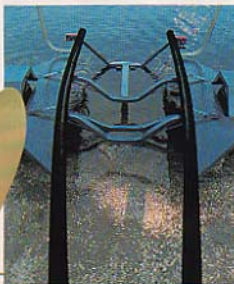

with superior materials, advanced techniques and the masterful touch of employees who truly love what they are doing.

Quality craftsmanship and traditional excellence do not stop with the completion of a fine boat. Completing the package, Correct Craft manufactures its own trailers—each one precisely engineered to match the hull of a specific boat. Correct Craft is one of only a very few boat building companies that owns and operates its own trailer manufacturing facility.

Correct Craft trailers are incredibly rugged, and feature a design especially suited for the inboard drive system of our boats. Custom fitted bunks cradle boats properly and securely, eliminating stress and distributing the load over the entire length of the trailer. The convenient drive-on, drive-off system allows launch and recovery without having to leave the boat.

Quality is measured in the little details that complete your boating picture. From advanced glass fibers for stronger hulls to trailers that tow easy and true, Correct Craft takes a measure of well-earned pride in providing a superior boating package that is complete to the last detail.

MANUFACTURER'S MARKETING REPORT

The Martinique. Before You Get Your Hands On It... I Join It.

"It's incredible how much punishment a boat takes. Vibration. Impact. Torque. Water and temperature extremes. Of course, some boats are built a lot better than others to stand up to years and years of tough use."

"My name is Ann Neal, and I help supervise construction of Correct Craft boats like this Martinique. One of the most important things I do is see that the hull and deck are bonded tight together."

"The way we do it is unique, using aluminum rivets, fiberglass and resin, silicone bond and stainless steel screws. It takes us a little longer, because we go through a complicated four-step process each time, on each Correct Craft boat. But we get a bond that's a whole lot stronger."

"I know it's one of those things you don't notice. But then a boat joint is one of those things you shouldn't notice. Ever."

Attention, Dealers! If you'd like to represent the full-line of Correct Craft boats—each one built by craftsmen and backed by pride—contact Correct Craft today.
