Standard Features / Warranty

Strange that something as tragic as war can serve to unify people around the globe.

The Persian Gulf crisis brought a world fraught with dissention and turmoil together as a single entity. It reminded us of our own fleeting mortality. It put things in a new perspective; issues of life and death have a way of doing that.

Although the United States did not call upon Correct Craft to build assault boats as it did during World War II, Correct Craft was there

in spirit and prayer. And now, in the wake of the war, Correct Craft recognizes an opportunity to perpetuate the unity created by the war.

So, for 1992, Correct Craft introduces two new models designed to get families and friends together in a healthy, fun environment: presenting the new Ski Nautique Open Bow and the Nautique Excel Open Bow.

The Ski Nautique Open Bow features the same competition class hull as the tournament towboat closed bow design. But the open bow

area provides additional seating for up to three passengers. World class slalom runs can be achieved while the whole gang watches in awe from the boat!

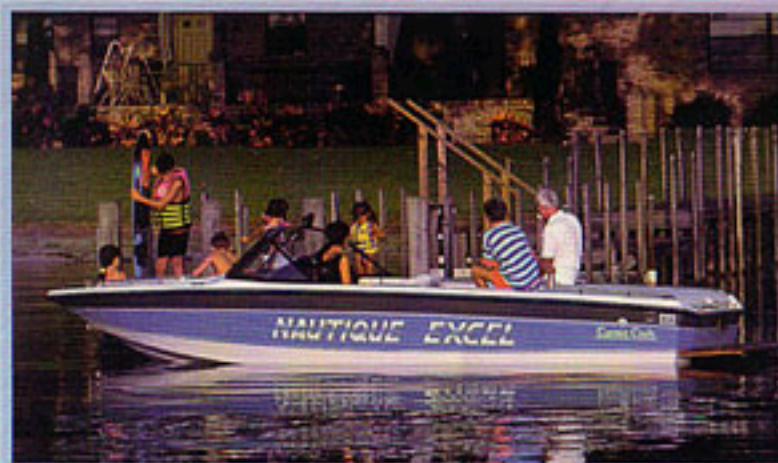

The Nautique Excel Open Bow's deep-v hull slices effortlessly through rough water while providing a smooth, dry ride. It throws a championship caliber barefooting wake as well as an excellent water skiing wake. It features a nine passenger capacity and abundant storage.

We realize that a couple new models probably won't have a significant effect on the world. But if even one family discovers the joy of being together on the water through a Correct Craft boat, then we've surpassed our every goal.

It's a single step. But we're headed in the right direction.

Walter N. Meloon
President/Chief Executive Officer

"If even one family discovers the joy of being together on the water through a Correct Craft boat, then we've surpassed our every goal."

A MESSAGE FROM OUR PRESIDENT

Get championship caliber slalom wakes with open bow convenience in the 1992 Ski Nautique Open Bow.

With conventional closed bow towboats, use of the center mounted pylon prohibits passenger seating in any area aft of the observer's seat. Skiers are often faced with the uncomfortable decision of skiing off of the transom tow ring or leaving a few friends on shore.

But thanks to the new Ski Nautique Open Bow configuration, passengers can stretch out and relax in the spacious bow while the skier enjoys tournament towboat wake characteristics.

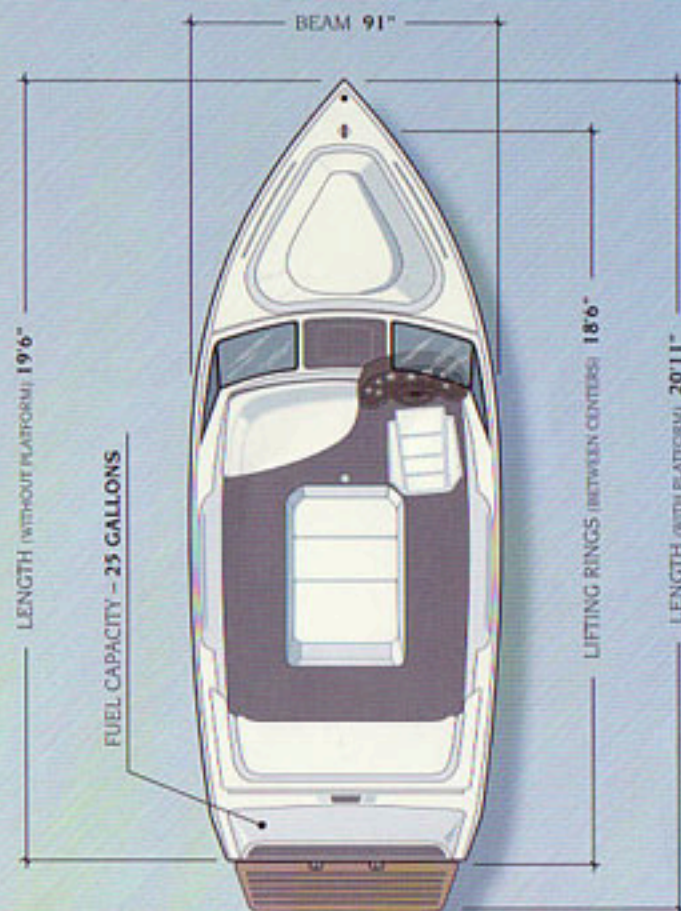

The Ski Nautique Open Bow features the same hull as the closed bow model but with a noticeably modified deck which will accommodate up to three passengers.

Like the closed bow design, the open bow model offers abundant bow storage conveniently accessed by raising the hinging observer's seat. Passengers in the bow can also access the storage area through a small door in the step-through area.

If you don't like to have to choose between your friends and your skiing, you should choose the new Ski Nautique Open Bow.

- Ample Bow Storage
- Bow Seating
- In-dash Beverage Holder

APPROXIMATE WEIGHT - 2475 LBS.
(WITH STANDARD FEATURES)

DRAFT - 24"
(NOT UNDER POWER)

S K I N A U T I Q U E O P E N B O W

With an already unparalleled low wake and virtually no spray, Correct Craft engineers were hard-pressed to improve upon the existing Ski Nautique. So they turned their attention to aesthetic details and came up with a few changes sure to please.

One of the most noticeable changes is the elimination of the audible systems alarm. Thanks to a sophisticated engine management system and state-of-the-art VDO gauges, engine function is constantly monitored and readily displayed.

Two additional accessory circuit breakers have been designed into the dash pod near the ignition

switch. Equipment such as video cameras, spotlights or heaters can be operated from these switches with proper installation.

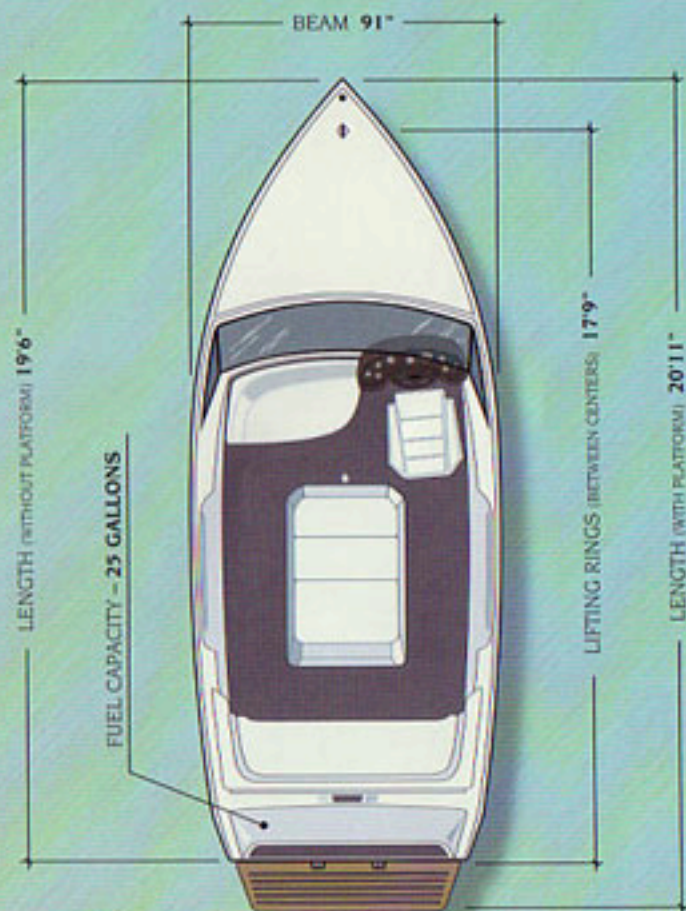

Extended windshield wings give the profile a more sleek appearance. There's a driver's side molded-in beverage holder to starboard. To port, the glove box has been re-designed to rest flush with the deck.

The optional stereo can be mounted in the locking glove box or vertically next to the driver for easy removal to prevent theft.

Serious skiers are serious about the Ski Nautique.

- Locking Glove Box w/Stereo Mounting Space
- PROTEC™ Engine Management System
- Dual Airguide Speedometers

APPROXIMATE WEIGHT – 2340 LBS.
(WITH STANDARD FEATURES)

(NOT UNDER POWER)

SKI NAUTIQUE CLOSED BOW

Make way for a fast, fun and functional new open bow model from Correct Craft. The new Nautique Excel Open Bow features a nine passenger capacity in a sleek, performance boat design.

The Nautique Excel v-drive configuration was introduced in 1991 as an excellent vessel for boating in larger bodies of water and as Correct Craft's premier barefooting boat.

Its deep-v entry can carve a soft, dry ride out of otherwise turbulent water while simultaneously throwing a tournament caliber barefooting wake.

For 1992, avid barefooters and boaters can

invite even more people to come along thanks to the new open bow seating area.

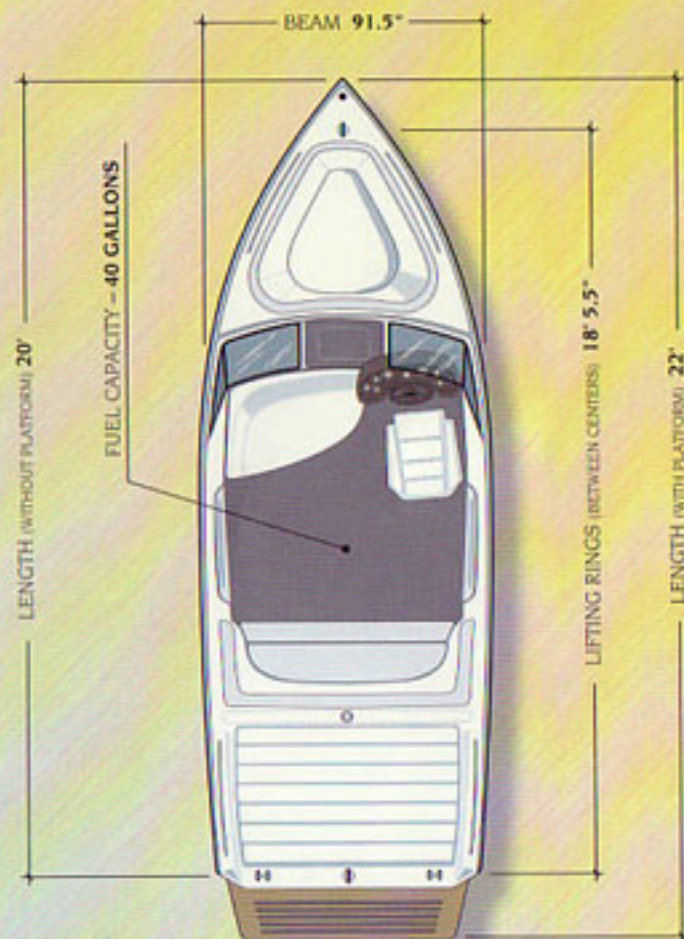

The hinging gull wing observer's seat lifts to provide unencumbered access to a spacious bow storage area. Additional storage is located in the engine compartment beneath the padded sun deck.

Other standard features include a tonneau cover, locking glove box and aft mounted ski pylon.

If you can't make room for your family and friends in your current boat, make room for the Nautique Excel Open Bow.

- Transom Grab Rail
- Center-open Windshield
- Optional AM/FM Cassette Stereo

APPROXIMATE WEIGHT - 3000 LBS.
(WITH STANDARD FEATURES)

DRAFT - 31"
(NOT UNDER POWER)

NAUTIQUE EXCEL OPEN BOW

A smooth, dry ride. A spacious cockpit. Correct Craft quality and dependability. These characteristics alone make for an outstanding boat, but add to that a competition caliber barefooting wake, excellent water skiing wake and a 40 gallon fuel capacity and you have a remarkable craft.

Because of the ample freeboard afforded by its deep-v hull, the Nautique Excel Closed Bow is aptly suited for bay or large lake boating. Its superior maneuverability and versatility also make it well-suited for inland boating.

Its v-drive configuration —positioning the

engine astern— expands the cockpit to a spacious seating arena. Gear can be stowed beneath the hinging observer's seat or in the engine compartment with the help of the hydraulic hatch actuator.

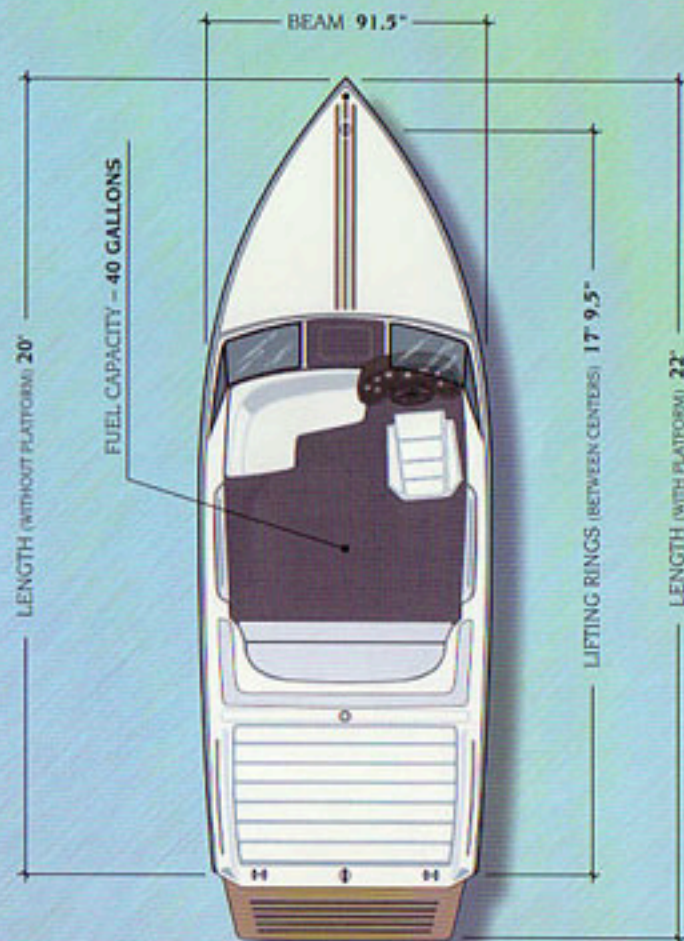

Avid barefooters can choose the 454 c.i.d. engine option and the optional Barefoot Nautique graphics package to transform their Nautique Excel Closed Bow into a lean, mean barefooting machine.

Whether you prefer lounging on the padded sun deck or racing around the lake on the soles of your feet, you can have a boat that does it all.

The Nautique Excel Closed Bow is opening new avenues in recreation.

- Dash Pod
- Optional "Barefoot" Graphics
- Ski Pylon

APPROXIMATE WEIGHT
(WITH STANDARD FEATURES) - 2900 LBS.
(WITH OPTIONAL 454 C.I.D. ENGINE) - 3100 LBS.

DRAFT - 31"

NAUTIQUE EXCEL CLOSED BOW

The Sport Nautique is Correct Craft's only direct drive, walk-through bowrider model. It offers a nine passenger capacity in a striking euro-style design.

Its molded in-floor ski locker located between the two adjustable captain's chairs provides convenient storage for easy retrieval of gear. There's even a handy accessory tray for holding smaller items in the locker. Other valuables can be stowed in the locking glove box. Additional storage is located in the bow walk-through area and beneath the bow and stern seat cushions.

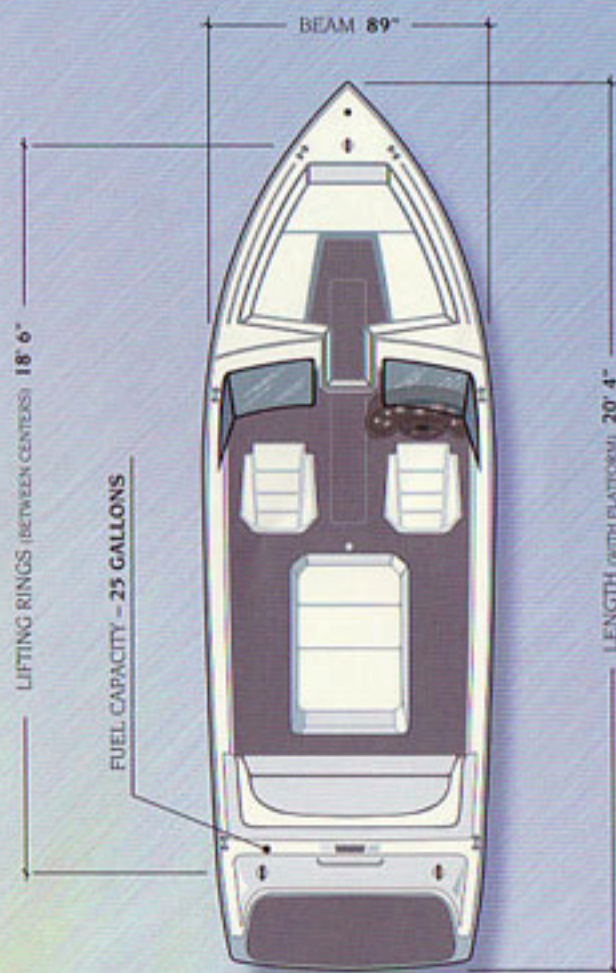

This season the Sport Nautique features excit-

ing new graphics like those found on the legendary Ski Nautique. And watersports enthusiasts will appreciate the solid aluminum tow pylon, standard on all Sport Nautiques for 1992. A stainless steel transom grab rail has been installed for easier boat access and two additional accessory circuit breakers adorn the ergonomically designed helm.

The Sport Nautique is the optimum recreational craft, perfect for everything from slalom skiing to kneeboarding. Get the dependability and maneuverability of an inboard and the spaciousness of a bowrider. If you're looking for versatility and comfort, you're looking for a Sport Nautique.

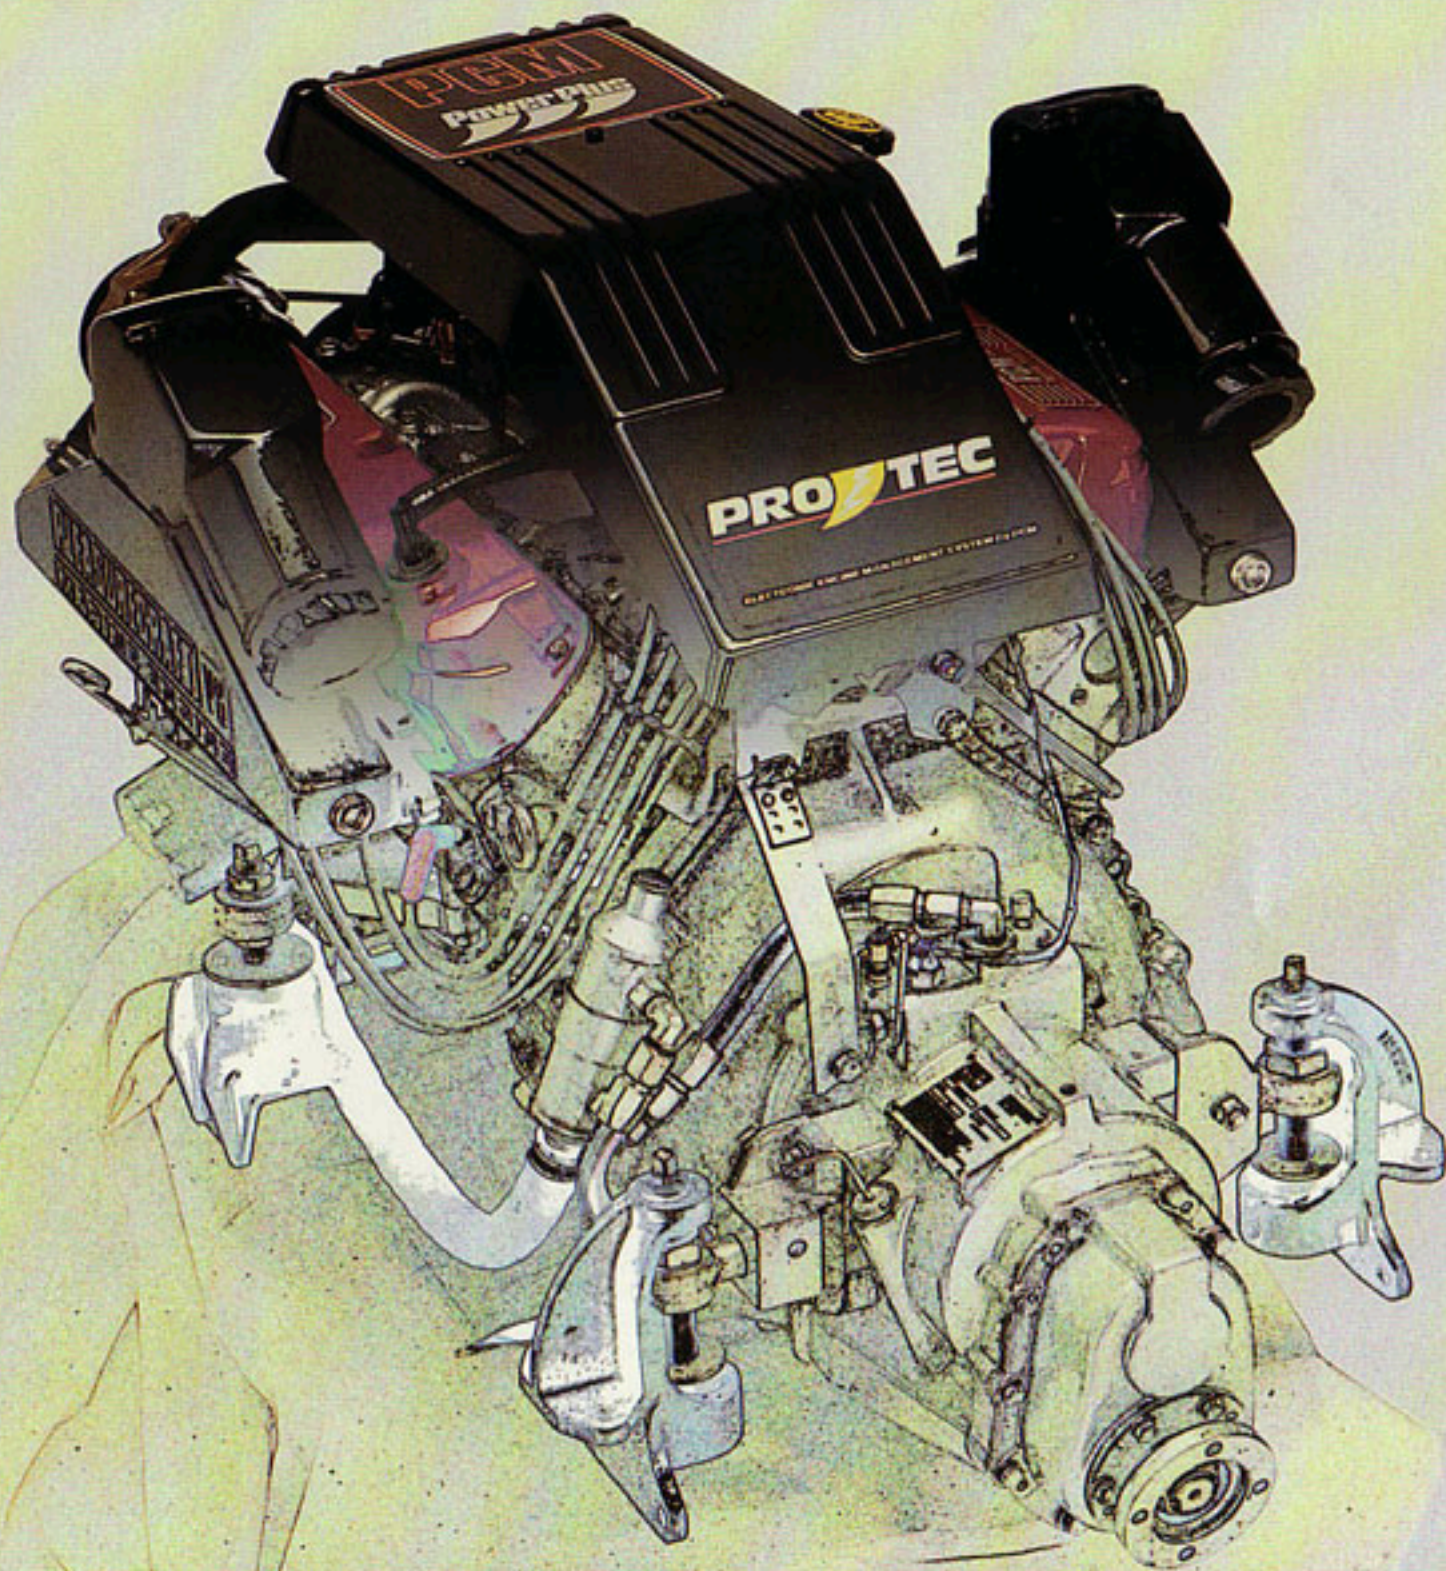

- Tow Pylon

S P O R T N A U T I Q U E

Exciting innovations take place daily in the marine industry. Correct Craft's task is to evaluate new components and procedures and implement the ones which serve to better the Correct Craft product.

For 1992, Correct Craft offers an optional 285 horsepower 351 c.i.d. engine. This additional horsepower is achieved without adding significant weight to the boat, thereby translating to pure power! Or choose the standard 351 c.i.d. engine with a 240 horsepower rating. Barefooting

enthusiasts can choose from these two engines or the optional 454 c.i.d. engine for their Nautique Excel Closed Bow.

The remarkable PRO TEC™ engine management system PCM introduced last year is standard on all PCM engines. This year it has eliminated the need for an audible systems alarm on the Nautiques. PRO TEC™ and the standard white-faced VDO instrumentation on the sophisticated Correct Craft dash pods are all

you need to detect potential systems difficulty.

ISODAMP®CN is also an integral part of all Correct Crafts, serving to dissipate noise and vibrational energy caused when water impacts the hull.

Most of the other improvements to the Correct Craft line are cosmetic - the addition of two open bow designs, new graphics on the Nautique Excel and the Sport Nautique and the new sleek looking extended windshield wings.

You'll still find the stainless steel hardware throughout. You'll find a thicker gelcoat than the industry standard. You'll get circuit breakers instead of fuses. Exclusive use of AME 4000 resin. Only the best goes into a Correct Craft so that you get the best out of it. Some people in the industry call it overkill. At Correct Craft, we call it quality.

"Only the best goes into a Correct Craft. Some people in the industry call it overkill. At Correct craft, we call it quality."

Your Nautique is more than just a boat, it is an investment. Protect your investment by securing a custom-made Correct Craft trailer specifically designed to support your boat's hull configuration.

Notable standard features include solid axles, sealed wheel bearing and surge brakes with a special free-backing plate which facilitates uphill backing.

Get the same attention to detail in your trailer that went into your boat. Depend on Correct Craft quality.

STANDARD FEATURES ON ALL TRAILERS:

Lights, Dolly Jack, Fenders, Loading Equipment, Safety Chains, Surge Brakes 2" Trailer Coupler and Pinstriping.

OPTIONAL FEATURES ON ALL TRAILERS:

Spare Tire and Custom Paint.

¹ Maximum Load Carrying Capacity is the weight of the boat and all additional equipment (fuel, battery, gear, etc.), excluding the weight of the trailer.

States have varying laws about trailer tie-downs. Learn what your local and state laws are about trailer tie-downs before ordering your Correct Craft trailer. Tie-downs are equipped on all Correct Craft trailers, however, you are responsible for buying and installing the straps.

CAUTION: TRAILER FENDERS ARE SLIPPERY WHEN WET. TO PREVENT PERSONAL INJURY, USE

RELAX AND ENJOY

All new 1992 Correct Craft boats are covered by both a limited Lifetime Warranty and a transferable limited Five-Year Warranty.

The limited Lifetime Warranty assures the original purchaser of any new Correct Craft boat that the deck, hull and stringer system will be free of defects for as long as he or she owns that boat.

The transferable limited Five-Year Warranty is enormously popular with individuals buying or selling a Correct Craft owned for fewer than five years.

So whether you keep your boat for a lifetime or tend to trade up every few years, Correct Craft has a warranty policy to suit your needs.

See a Correct Craft dealer for a copy of the entire Correct Craft Warranty. Correct Craft boats are built to last. We put it in writing.
