**NAUTIQUE NOW OFFERS NEW GREEN PCM ENGINES
WITH ENHANCED PERFORMANCE CAPABILITIES**

Orlando, FLA (April 17, 2008) –Correct Craft, manufacturer of Nautique boats, and Pleasurecraft Marine Engines (PCM), Correct Craft's exclusive engine supplier for over 30 years, now offers all Nautique models with the optional patent pending PCM Catanium Clean Emission System. These new engines exceed rigorous government emission control standards and take support for a clean environment to the next level.

PCM's new Catanium Clean Emission System was specially developed using precious metals and the latest in integrated catalyst technology. This advanced equipment greatly reduces emissions and dangerous carbon monoxide for a cleaner, safer boating environment. Additionally, these engines provide boaters with enhanced performance capabilities such as 409 horsepower in the new 6 Liter catalyst engine and greater fuel efficiency while on the water.

"We have offered PCM engines in our Nautique boats for a long time and the company continually exceeds our expectations," stated Correct Craft's President/CEO Bill Yeargin. "The Nautique team is proud to provide its customers with performance-oriented engines that are also eco-friendly."

The Nautique line of boats is produced by Correct Craft, a family-owned manufacturer celebrating 83 years of excellence in the marine industry. Correct Craft, Inc. is known for delivering superior quality product, cutting-edge technology and exceptional service experiences. To see the complete line of Nautique boats, visit www.nautiques.com.
